4. NOTABLE FEATURES, HISTORICAL SIGNIFICANCE AND DESCRIPTION <span style="float: right;">OPEN TO PUBLIC <u>NO</u></span>  <p>The William Knight House is one of the finest and earliest houses in the area. It was built in 1745, as is indicated on the tombstone date plaque in the west gable, which is located between two circular windows. It is three bays long and two bays deep with central door and is covered by an "A" roof. The brick is laid in Flemish bond with glazed headers throughout. There is a champhered water table and a two-brick belt course beneath the second story windows, where the pent roof began. It was constructed on all three sides. There was also a pent eave at the level of the attic floor, which is not yet replaced. The <del>Attic</del><sup>cellar</sup> windows have segmental arches above them and one vertical bar grill remains on the south facade. Some original frames remain but are in very poor condition. There is a chimney on each gable. Presently the building is in the process of restoration by the owner. <del>9/6</del> sash have been reinstalled in some windows. The first floor windows have not yet been replaced; these are where the original frames remain which have a later frame and sash installed inside the old frames. A two story two bay wing is built on the east gable.</p>
